## training workshop

# HOW TO BUILD AN ARTIFICIAL INTELLIGENCE CHATBOT FOR HIGHER EDUCATION

AI chatbots can be used as virtual tutors to provide a personalised learning experience to students.

**Dr Christopher See**

Principal Supervisor /  
Lecturer  
SBS, CUHK

In this training workshop, Dr Christopher See will demonstrate how to use tools including Google's Dialogflow and Typeform to create simple yet effective teaching chatbots. He will explain various chatbot techniques and their technological underpinnings.

Practical hands-on exercises of chatbot development will be provided in the workshop. Participants will build and test their own chatbots designed for each individual's educational setting.
